conservatories

Summer 2016

In this issue: Fit Show Review, Product News, Machinery Investment, Alu-tec News and more....

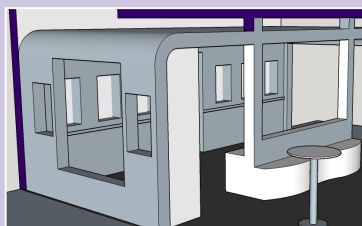

April seems a long time ago now, but we are pleased to say that Climatec's appearance at the Fit Show proved to be an outstanding success.

It was hugely satisfying to watch the stand take shape during the build-up days and to finally see those 3d drawings transformed into Climatec's exhibition stand.

You couldn't fault the standbuilders efforts and once the product was installed and finishing touches applied we could happily take a deep breath and enjoy the exhibition.

JUST SOME OF THE PHOTOS OF PRODUCTS SHOWN ON OUR STAND

Aluminium Casement Windows

PVCu Casement Windows

Vertical Sliding Window

1930s PVCu Door

Aluminium Feature Window

Variety of Corner Samples

Victorian PVCu Door

The aim of the show this year was to showcase a variety of products that are part of 'The Climatec Collection' a selection of windows and doors that provide our customers with **'more than just a window'**.

A large aluminium feature window took pride of place in the centre of the stand, enticing visitors in to find out what else was on offer from Climatec. And they weren't disappointed. First to catch their attention were two new doors that we fabricated especially for the exhibition. These PVCu doors, designed in style for period properties, were trialled to gauge visitor interest and it was pleasing to see what a success these were. So much so, these will now become part of a collection of period doors that Climatec will soon be launching to our customers. *More information on these doors can be found overleaf.*

A large vertical slider sat on one side of the stand, flanked by a Calibre casement and a Calibre tilt and turn window. An aluminium bi-fold featured on the other side. Also popular with the visitors was the collection of PVCu and aluminium windows that dominated the back gallery area, all of which rotated in place on spindles to enable visitors to see both the internal and external features of each one.

If you didn't make it along this year, Climatec have made the decision to exhibit again at next year's Fit Show, at the NEC. We will keep you posted of dates and details for 2017 in future issues of Vista.

PERIOD DOOR COLLECTION

COMING SOON!

Following their exciting debut at this year's FIT Show, our new timber replacement doors are about to join Climatec's ever-growing portfolio of products.

Taking inspiration from the Georgian, Victorian and Edwardian architectural styles, these new PVCu doors rival any traditionally designed composite door and are perfect replacements for the wooden doors found on older properties.

When designing these doors, many hours were spent researching each era of building styles. Once the designs were decided the fabrication process was put in place to combine mechanical joints, welding and the new 50mm astragal bar to create the overall effect.

With many authentic features required to replicate a true timber door, it was down to the ironmongers for inspiration, settling on pull handles and doctor knockers. The introduction of a slam shut lock also eliminates the need for a handle on the external face. This all culminated in a collection of doors that will confidently grace the front of any period building.

This new collection will join the many other doors found on Climatec's manufacturing line. Once all production processes, prices and order forms are in place, we will provide all the necessary information that you will need to place your first order.

- PVCu doors bespoke to original property type
- Variety of glass designs available
- Fitted with Sigma Hybrid Hinges
- MACO ZTA slam shut door locks for authenticity
- Choice of doctor knockers, finger pulls and centre knobs complete the traditional look

HYBRID HINGE

YES OR NO?

The new PVCu doors from the Period Collection shown left are supplied with the new Sigma hybrid hinges.

Ideal for residential front doors, this hinge incorporates the styling of both the butt and flag hinges in order to provide a more traditional appearance. Furthermore these hinges are available in finishes to match all door furniture and as a special request can also match any door foil colour.

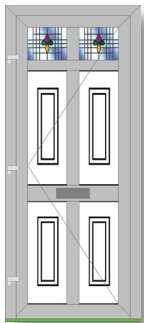

The hinges are suitable for inward and outward opening doors and have full 3d adjustment:-

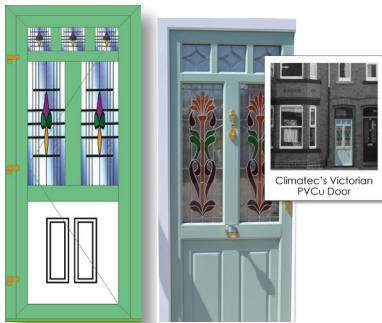

- 8mm left to right
- 4mm up and down
- Compression

A specification sheet for these hinges can be found in the technical area of our website.

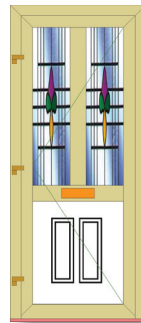

the GEORGIAN
(design influences by properties built 1720-1820)

the VICTORIAN
(design influences by properties built 1830-1901)

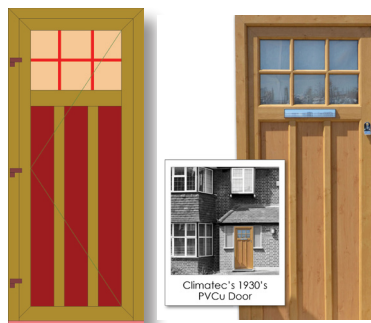

the EDWARDIAN
(design influences by properties built 1901-1918)

the ART DECO (design influences by properties built 1925-1939)

the 1930'S (design influences by properties built in the 1930s)

Colours available: Ruby Red, Elephant Grey, Racing Green, Chartwell Green, Clotted Cream, White Ash, Black Brown, Anthracite Grey... Plus any RAL painted colour

HAVE YOUR SAY!

At Climatec we always value our customer feedback and this is particularly helpful to us when launching new products and considering changes to hardware for example.

To this end we would appreciate your comments in respect of this new hinge. Do you think the product seems better for installation purposes? Is it a better option for you to sell on to your customer?

Please let us know your thoughts and as always, we appreciate any other feedback you may have on any other Climatec products.

NEW from Alu-tec UK

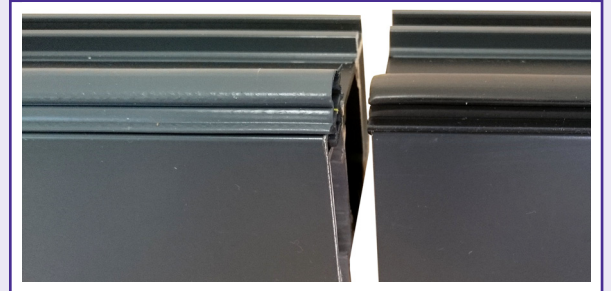

Anthracite Grey Gasket for Aluminium Products

You asked and we listened! Further to requests from our aluminium customers, we are pleased to announce that our anthracite grey all windows and doors can now be ordered with anthracite grey gasket instead of the black gasket currently used.

The new gasket is a perfect match to the anthracite grey finish on our all casement windows, doors and bi-fold doors and provides a neater and more aesthetically pleasing product.

Updated order forms can be found on our website with the option to pick either the black or the new anthracite grey gasket for the processing of your products.

Please do not hesitate to contact us for further details if required.

AND HANDLES GO GREY AS WELL

To enhance the look of our anthracite grey aluminium products further, your handles can now match too!

Left and right handed window handles are now available in anthracite grey 7016 and, to complete the set, your aluminium doors can now be ordered with anthracite grey door handles too.

This option can now be found on our aluminium window and door order forms which can be found on our website.

ALUMINIUM FACTORY IS HOME TO A NEW CNC ROUTING MACHINE

The Climatec Group's Aluminium Division, Alu-tec UK have just taken delivery of a fully automated CNC routing machine, the first allocation from of a year long investment programme agreed in order to boost its aluminium production facility.

The accuracy provided by this new CNC routing machine will enable the factory to increase their productivity, from routing door locks to curtain walling.

Alu-tec are looking to double their production figures over the next 12 months and are investing heavily to achieve their targets.

Look out for more news in future issues of Vista.
