the **GEORGIAN**

(design influences by properties built in the 1720-1820)

THE GEORGIAN door is a grand, panelled door found on properties built between 1720 and 1820. A classic style influenced by Roman architecture and consisting of six panels, these doors would be typically found sat between two columns with a decorative fanlight above.

- Wide Midrail available to enhance design and accommodate traditional styled letterplate
- Energy efficient - U Values are better than standard composite doors
- Traditional styled door furniture includes finger pulls, door knockers and centre pull knobs
- Smart Tech options available
- 21 door colours (incl White) to choose from with matching frame

the **REGENCY**
from the Period
Door Collection

the **REGENCY**

(design influences by properties built in the 1811-1820)

THE REGENCY door epitomises grandeur found in properties during Prince Regent's reign from 1811 to 1820. Door designs were classical, with the symmetrical stylings of the Georgian door and set in buildings with elaborate features such as decorative lead fanlights over the doorway, sash windows, ornate wrought iron balconies and fluted columns.

the **Regency**

why buy a **period door**?

- An alternative to wooden doors
- Bespoke designs to customer's choice
- The Regency is available with 7 types of panel configurations
- High Security locking system
- Bolted corners for extra strength and security
- Shaped frames
- Energy efficient - U Values are better than standard composite doors
- Traditional styled door furniture includes finger pulls, door knockers and centre pull knobs
- Smart Tech options available
- 21 door colours (incl White) to choose from with matching frame

the **VICTORIAN**
from the Period
Door Collection

the **VICTORIAN**

(design influences by properties built in the 1830-1901)

THE VICTORIAN door is a perfect replacement for the mock gothic styling of doors from the 1830-1901 era. The elaborate coloured designs and leadwork of the glazing units create the ornate glass effect found on a typical Victorian door.

the **EDWARDIAN**
from the Period
Door Collection

the **EDWARDIAN**

(design influences by properties built 1901-1918)

THE EDWARDIAN door is a replica design from properties built in 1901-1918. Not quite as lavish as the Victorian, this panelled door is finished with a lead or bevelled window design to accentuate the appearance of this style of house.

why buy a **period door**?

- An alternative to wooden doors
- Bespoke designs to customer's choice; the Edwardian is available with 8 types of panel configurations
- High Security locking system
- Bolted corners for extra strength and security
- Glazing options to create individuality with pre-designs or customer requests
- Shaped frames

- Traditional styled door furniture includes finger pulls, door knockers and centre pull knobs
- Smart Tech options available
- 21 door colours (incl White) to choose from with matching frame

the **ART DECO**
from the Period
Door Collection

the **ART DECO**

(design influences by properties built 1925-1939)

THE ART DECO door from this collection is designed to replicate the streamlined appearance of doors found on properties built between 1925 and 1939. A simple, modern effect of parallel straight lines created this stunning door and would definitely not look out of place on a house built with an Art Deco edge.

the **1930s**
from the Period
Door Collection

the **1930s**

(design influences by properties built in the 1930s)

THE 1930s door is based on the half timber and mixed red brick/pebbledash design of properties built in the 1930s. Typically an oak door with iron fittings, we have designed and produced this door with astragal bar to provide the perfect replacement for homes built in this period.
