

Flush Sash Manufacturing Tolerance Guidelines

At Climatec, we manufacture our windows to the guidelines set by our profile suppliers and although we strive to perfect the sightlines on our flush products, the nature of the uPVC industry and manufacturing processes it can never be guaranteed.

The tolerance guidelines set by our suppliers confirm that there is an ideal gap size, however there is an acceptable tolerance to this as seen below.

REHAU

“When fitting the sash to the frame, the visible gap on the outside (5mm nominal) should be no more than 4-6mm”

RESIDENCE

“Nominal visible gap required for our flush sash is 6mm and should be no less than 5mm”
